

Konzept Task 9

HTML:

DBClient.ts:

Server.ts

handleRequest

[case: "fill"]

let find: number = query["Suche"]

Default

respond (D)

Database.find(matrikel = number)

respond (response, "found")

muss ich hier
die gefundenen
Studenten
zusammenführen?

Database.findMat(matrikel nr.) (H)

Database.ts

Datenbank muss zugänglich gemacht werden

findMat

- a: number
- b: Function

let cursor: Mongo.Cursor = students.find();

cursor.toArray(prepareAnswer)

prepareAnswer (H) → O

prepareAnswer

- e: Mongo.MongoError
- Array: StudentData []

(-e)

callback ("Error" + e)
